

# SHAREPOINT HEALTH CHECK

## GET THE MOST OUT OF YOUR SHAREPOINT INVESTMENT

Microsoft SharePoint allows your employees to be self-sufficient and collaborate among teams. Proactive reviews of the site allow you to address issues before they impact your business. HealthChecks should be conducted every six months, to ensure patches are properly applied and performance is optimized.

The SharePoint HealthCheck is designed to ensure that your environment is setup under Microsoft best practices. Our professionals review the entire site, providing you with a full diagnostic report of the environment.

The health check diagnostics reveal the root causes of problems, not just the symptoms. You will be provided with a complete list of short term and long term remediation items.

### WORKING WITH US GIVES YOU THE ADVANTAGE OF:

- Expertise in identifying and rectifying common environment issues and pain points
- Expertise in the SharePoint platform utilizing Microsoft's best practices
- Planning for growth
- Identifying potential performance improvements
- Updating to the latest Microsoft recommendations
- Understanding your specific performance data and usage, and working with your IT team to create actionable items
- Familiarity with regulated industries, and how security and governance should be applied to comply with those regulations
- Documented review of current environment & recommended remediation
